Fashion Institute of Design &

Merchandising, Los Angeles, CA | 2011

Associates of the Arts — Graphic Design

SUMMARY

Full-Stack Developer (Frontend focused) with a multidisciplinary background in Fashion and Graphic Design providing strong problem-solving skills and a detail-oriented mindset. An excellent collaborator who works well in team - based projects and independently with strong interpersonal skills. Aiming to leverage academic experiences, a proven knowledge of web design, application development, and brand development. With each project, the goal is to blend art and technology to transform complex ideas into simple designs for better communication and user experiences.

EXPERIENCE

AppBeware — *Visual Design & Frontend Developer*

GitHub: github.com/JAE-S/AppBeware | | Demo: www.appbeware.com

A crowdsourcing platform designed to empower users to raise awareness about the potential dangers of mobile apps.

- o **Role:** Designed UI prototypes (Adobe XD), created brand graphics, collaborated with an Agile team to build the application utilizing React and Redux for state management
- o **Technologies:** React, Redux, Connected-React-Router, Material UI, HTML5, ES6, CSS, JavaScript, Axios, Concurrently, Sequelize, Express, Passport, Google Sign-in API, Kanban Boards, Git, Github, Heroku, Lucid Chart, Adobe XD, Illustrator, After Effects

Fetch-A-Friend — *Full Stack Developer*

GitHub: github.com/JAE-S/Fetch-A-Friend | | Demo: fetch-my-friend.herokuapp.com/

Fetch A Friend takes digital matchmaking to the next level for pet owners. This app provides furry companions with the opportunity to connect with other pups that share similar interests.

- o **Role:** Architected, designed, and developed user interfaces for clean, simple usability
- o **Technologies:** Materialize, HTML5, CSS, JavaScript, JQuery, Node, Express, JSON, AJAX, Git, Github, Heroku, Illustrator, Photoshop

Fashion-That — *Full Stack Developer*

GitHub: github.com/JAE-S/Fashion-That | | Demo: fashion-that.herokuapp.com/

A web-scraping application that allows Fashion enthusiasts to review the latest articles from SHOWstudios and create notes all in one place without ever leaving the browser window.

- o **Role:** Implemented a NoSQL database to handle changing data as well as executed innovative solutions for the product direction, visuals and user experience
- o **Technologies:** Materialize, HTML5, CSS, JavaScript, JQuery, Node, Express, Handlebars, Axios, Cheerio, Mongojs, Mongoose, MongoDB JSON, Git, Github, MLab, Heroku, Photoshop

WORK EXPERIENCE

Trilogy Education Services (Full-Stack Flex Coding Bootcamp) — *Teacher's Assistant*

January 2020 - Present

- o Enable developers to effectively utilize libraries and frameworks such as HTML5, CSS, JQuery
- o Evaluate code efficiency and inspire developers to implement industry best practices
- o Mentor students to exploit resources such as documentation, Stackoverflow, Google, and their peers while problem solving and debugging code

Creative Designer (Freelance), USA, UK, and France — *Graphic Design / Prop Design*

May 2012 - Present

- o Enhance digital images by implementing expert knowledge of Adobe Creative Suite
- o Develop multimedia designs/installations while ensuring client needs are satisfied
- o Stimulate user engagement by revitalizing visual design elements and marketing collateral while maintaining the brand's identity

Emperia Handbags, Los Angeles, CA — *Associate Handbag Designer*

November 2017 - January 2019

- o Created intuitive, brand appropriate, seasonal designs for clients such as Nordstrom, Belk, Sole Society, New York & Company as well as led design presentations in New York, Seattle, North Carolina, and Los Angeles
- o Streamlined communication strategies to navigate language barriers while overseeing production teams in China
- o Facilitated iterative delivery of products with all key stakeholders

Emperia Handbags, Los Angeles, CA — *Assistant Handbag Designer*

November 2016 - November 2017

- o Advanced research and development by traveling to China to source seasonal materials
- o Reconciled prototypes to design specifications to mitigate delivery risks
- o Generated technical documentation for overseas production and enforced quality construction and adherence to brand standards
